

JUNE FURNITURE SALE

For some years past June has been a great Furniture month at this store. People have learned to look to this store at this time of the year for greater values than can be found elsewhere. We make unusual preparations for this month, buying in larger quantities, making selections from the choicest of new Spring assortments, and practically naming our own prices, as this is the time of the year manufacturers are glad to dispose of their surplus stocks at far below regular prices. Iron Beds, from \$3.50 up; Dressers, from \$7.50 to \$45.00; Chiffoniers, from \$5.50 to \$38.00; Kitchen Cabinets, from \$5.75 to \$23.00. A STUFFED EMPEROR.

Fate of Valerian of Rome, Captured by the Persians.

One of the most remarkable stuffed skins on record was that of Valerian, emperor of Rome, who was taken prisoner and afterward kept in chains by Sapor, king of Persia. He was either killed in a tumult or by order of his conqueror, who was perhaps fearful of losing his valuable living trophy, in the year 260. The body of the dead emperor was treated with no more delicacy than when it held the spark of a living one. It was stuffed, the hide after being tanned was stuffed, painted red and suspended in the chief temple of the capital. It remained there for many years and was the popular spectacle for holiday makers and visitors from the country. But it was put to more important ends than this. It was made a diplomatic engine of much significance and efficiency. In after times it often happened that the Roman envoys at the Persian court had misunderstandings more or less serious with the government to which they were temporarily accredited. When these ambassadors from Rome grew arrogant in their demands, it was the custom to conduct them into the presence of the stuffed skin of the emperor of Rome, where they were asked if humility did not become them at sight of such a spectacle.

Identified Himself.

"Some people have odd ways of identifying themselves," said a disgusted westerner visiting New York. "The other night a man came up to me in my hotel and claimed old time acquaintance. I saw visions of the confidence game at once and fought shy. How do you think he convinced me? Well, sir, he finally pulled out one of his eyes. Yes, sir, he did. It was a glass eye, of course, but I then realized his peculiar affliction as being a greatly altered appearance. But, you know, it wasn't a pleasant experience. In fact, I never shall be able to carry a glass eye in my pocket."

Magnified Flour.

The best microscopes magnify about 16,000 diameters and make fine flour look like a heap of rough stones.
